

PERU - GOLD, COPPER AND SILVER - A WINNING COMBINATION

- 3 concessions 70 kilometers from the coast in Southern Peru
- 2050 Hectares in a tranquil part of Peru
- Fully owned through 100% Peruvian subsidiaries
- **52 surface samples assayed**
- Gold above 10 grams in a surface sample with 1.7% Cu and 70 grams of Silver
- Silver above 200 grams in a surface sample with 8.3% Cu and 0.35 grams of Gold
- Silver at 171 grams in a third sample with 5.3% Cu and 0.17 grams of gold
- Possibility that this is a Manto type deposit laid down into a depressed surface area
- Experienced exploration team led in Peru by **Rene Calle**
- 10,000 tonne per month mining license quickly and easily obtained
- Possible JV to explore with Canadian listed entity
- Possible JV to develop and exploit with private Swiss Mining company

CHILE PROJECT

Our team have located a very large magnetic anomaly on open ground relatively close to the coast and with good road and port logistics in the Atacama desert of Chile, in a zone rich in large copper and gold mines.

- Purple areas indicate high Magnetic response= “green” Magnetite iron ore
- Blue and Green areas prospective for Gold and Copper
- Over 10,000 Ha of open ground available
- Exploration lease cost about \$8/Ha to acquire
- Hypothetical FOB cost into Kamsamax vessel for a 65% Fe Magnetite product in the \$50-\$60/tonne range, if the strong magnetics represent reasonable grades at reasonable depths.

Funds needed now to acquire this property and explore it. Please refer to web site www.chalametals.com for details on how to invest. Seeking to raise A\$750,000 so we can list in 2024 and acquire this project and do some preliminary exploration. Open to private equity or JV proposals.
